

Creating Graphics with Adobe Illustrator

Learn practical software skills to create vector graphics. We will conduct hands-on studio lessons using Adobe Illustrator – the industry-standard tool for producing graphics and illustrations for print and web. At the end of the course, you will be able to produce a series of simple vector graphics, illustrations and a page layout.

Target Audience:

Designers seeking to deepen or broaden their skills in architecture, building information modelling, construction, green and smart building development, urban design and planning, real estate development, space and interior design, retail display and promotional design, exhibition design, stage and lighting design, furniture design, advertising, event management and design.
